

Installing and Caring for Trimmers

On Your Raptor

If you bought the trimmers from me at the time of purchase of your wheel the trimmers will need to be installed.

The trimmer starter kit will have the following:

- 1) Trimmer inserts - qty 4
- 2) Trimmer holder track - qty 2
- 3) Attaching hardware for plastic track - 8 bolts / 8 nuts.

To install the trimmers:

- 1) On the wheel, locate the white piece in the running track. There are two holes or indents in the outsides of the wheel, you can use these to get the trimmers directly across from each other. Just go to the second set of holes from the white strip one direction, then once you have that trimmer installed go to the second set of holes in the other direction from the white piece in install the second Trimmer.
- 2) Insert the sand cloth with the grit side facing into the wheel, it goes on the outside under the lip, you may have to trim it a bit to fit flat but do not trim off too much. Your scissors need to be sharp but do NOT use a good sewing pair. The sand cloth will ruin a good pair of scissors.
- 3) Now the same thing for the Plastic mesh trimmer holder, you probably have to trim it too you can use a pair of sharp scissors to cut it with. The trimmers will lay more flat against the track if you curl them some in your hand before installing them, but they need to be under the lip of the front or back of the wheels edge. It makes it harder for your gliders to be able to get at the edge and keeps them from being inadvertently injured by it. When installing, please put the flat side of the trimmer plastic down against sand cloth and plastic mesh of the track.
- 4) Install the bolts and nuts. Start with one side then go to the other. You want the bolt head to go inside the wheel and the nut to be on the outside and two squares from each edge. Keep the outside piece of track – the holder as flat as possible.

5) Repeat the same for the other side of the wheel. There is a picture below for Trimmer placement !

Caring for the trimmers:

I recommend that you not take them out to clean or if you do put them back in the wheel before they dry. The cloth will shrink a little the first time you wash it and will also wrinkle.

Keeping the trimmer in place will prevent them from becoming unusable. You can soak them with the wheel if you like or just use blue Dawn and rinse them with a hose. You should be able to keep using them for about one and a half to two months, depending on how many gliders and how much they use the wheel.

As always you can get in touch with me if you need more help!

Best way is by emailing me at mygliderwheel@yahoo.com. I do have a Face Book page, but i am not on it every day! - My Glider Wheels and More - <https://www.facebook.com/MyGliderWheelsandMore>
